

ROBBERECHTS

Subject : Shutters Rauvolet in PVC – cleaning instructions

These cleaning instructions are for shutters Rauvolet in PVC, in particular for the following types :

- SE 16 PVC uni, structure and pattern
- SE 22 PVC uni, pattern and translucent
- SE 4 PVC uni, structure and pattern
- E4 PVC uni and pattern

Cleaning of the tambours is done with soapy water and a soft cloth.

The use of solvents such as acetone should be avoided because of the chemical interaction with PVC.

Cleaning using abrasive material is not permitted because of the risk of scratching the surface.
